EDUCATION

University of Notre Dame | Notre Dame, IN

May 2028

Bachelor of Science

Major: Computer Science

Cumulative GPA: 3.74

EXPERIENCE

Kahua | Alpharetta, Georgia

May 2026 – August 2026

Application Developer Intern

- Won Best Presentation award at an internal hackathon for building a React app that used the Kahua API to capture asset photos, populate records, and support inspection workflows.
- Developed automated unit tests in C# using .NET for Kahua's WinUI platform, expanding validation of core desktop workflows and improving regression coverage.
- Built and configured an XML-based application for a customer, translating business requirements into a tailored workflow within Kahua's construction project management platform.

Rover House Cleaners | Dallas, Texas

May 2025 – May 2026

Software Intern

- Designed and deployed an automation workflow to reduce manual data entry and client communication time by 5-10 hours weekly using the OpenPhone and Airtable APIs and Google Apps Script.
- Engineered a JavaScript Chrome extension that integrates the OpenAI and OpenPhone APIs, enabling AI-powered communication workflows directly within the browser.
- Fixed critical PHP security vulnerabilities that placed the personal information of more than 1,000 customers at risk.

LEADERSHIP ACTIVITIES AND MEMBERSHIPS

CS For Good Club | Notre Dame, Indiana

January 2026 - Present

President

- Led a 75 member student organization dedicated to developing software solutions for local nonprofits.
- Oversaw 7+ technical projects, bridging client requirements with student development teams.
- Led communications with community partners to define project scope and ensure successful deployment.

PROJECTS

CommitCrew | Creator and Developer

January 2026 - Present

- Developed a TypeScript WhatsApp productivity bot that lets accountability groups submit, track, and review task commitments through chat commands.
- Integrated OpenAI to grade completed commitments based on effort and specificity, generating automated scores and feedback for each member.
- Built persistent group, member, and commitment tracking with Supabase and connected WhatsApp messaging through the Baileys library.

WorkflowyCLI | Creator and Developer

December 2025 - Present

- Developed a high-performance CLI for Workflowy in TypeScript, featuring a custom interactive REPL with Unix-style commands (ls, cd, tree) and a modular registry architecture for scalable feature expansion.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C#, PHP, HTML/CSS, XML

Frameworks & Platforms: React, Node.js, .NET, WinUI, AWS, Firebase, Supabase, WordPress, Vercel

Tools: Git, Google Apps Script, Airtable, Railway, Codex
